KELLY'S EVERGREENS

EVERGREENS

Evergreens, with their beautiful symmetry and their richness of color, add grace and dignity to the landscape design as no other nursery product can. Within the past few years, evergreens have gained in favor for the planting of the home so that now, the modern design calls for practically all evergreens. And this favor has been justly won for, in winter as well as summer, their wonderful shapeliness and their gorgeous hues inoculate their surroundings with a spirit of cheerfulness and satisfaction.

To flank an entrance, the taller growing varieties are particularly effective; for rock walls, terraces and rockeries, the prostrate types should be used. As single specimens out in the lawn, there is no more beautiful than the Colorado Blue Spruce. For windbreaks and backgrounds, use the Norway and Colorado Blue Spruce.

Remember our help and advice in beautifying your home is positively free, hence feel free to write us on any of these questions. We are sure that we can assist you.

All of our Evergreens are dug with a large ball of earth about the roots to insure safe transplanting. Crating and transportation are charged at cost.
